TECHNOLOGIES

- React.js
- Next.js
- TypeScript
- Tailwind CSS
- State Management
- Vite
- JavaScript (ES6+)

Language

English (Fluent)

Persian (Native)

Work Experience

2024- 2025
Frontend Developer (Freelance)
Ponisha

Built and shipped a variety of real-world projects as a freelance frontend dev — from landing pages to full web apps using React, Next.js, Tailwind CSS, and Vanilla JS. Focused on clean code, responsive design, and smooth user experience across the board.

Projects

The Wild Oasis Dashboard
my-wild-oasis-dashboard.netlify.app | GitHub

Built a full-featured hotel management dashboard using React, Vite, and Supabase. Users can manage bookings, cabins, and settings in a smooth, responsive UI. Used React Query for data fetching and caching, react-hook-form for sleek form handling, and styled-components for modern styling. Integrated real-time updates, toast notifications, and clean data visualizations with Recharts.

The Wild Oasis Website
the-wild-oasis-website.vercel.app | GitHub

Designed and developed a booking website for a fictional hotel using Next.js, Tailwind CSS, and Supabase. Focused on delivering a smooth UX with responsive design, secure authentication (via NextAuth), and intuitive date selection using react-day-picker and date-fns. Backend powered by Supabase for real-time data sync and user management.

Snapgram
snapgram-psi-ten.vercel.app | GitHub

Built a full-featured social media app with React, Vite, and TypeScript. Users can create posts with images, like/save content, and explore others on the People page. Integrated Appwrite for authentication and database, react-hook-form + Zod for validation, infinite scroll with react-intersection-observer, and real-time interactions using React Query and Sonner notifications.
